

# Objective Of Project

1. To make user friendly platform for book readers.
2. To avoid a struggle of getting books by libraries and book stalls.
3. To get books it is open and free source.
4. To give 24/7 service to users.
5. To perform a website for book reader .

# Existing System

1. In the Existing system reader have to go to libraries for getting book.
2. Going to the book stalls and buying the book which is time and money consumer.
3. Every time the readers have to go libraries to get books for some time interval and giving back to libraries.
